

## Special Issue

# Signatures in Breast Cancer Diagnosis and Applications

### Message from the Guest Editors

Breast cancer constitutes 30% of all cancer types diagnosed in women. It is also the leading cause of cancer-related deaths among women. Traditional diagnostic technologies such as mammography have been proven to be reliable screening tools. Screening mammography is only recommended to women over 40 years old due to the harmful effects of ionizing radiation. However, an increasing number of breast cancer diagnoses are starting to be made in women at their early twenties. To this end, the goal of this Special Issue is to focus on the novel technologies and improvement in current methods which will enable improved early breast cancer diagnostics for women in their early twenties. Research regarding the improvement of the current diagnostics technologies such as mammography, magnetic resonance imaging (MRI) and ultrasound improved with artificial intelligence, as well as new medical diagnostics technologies including microwave imaging, impedance tomography, biomarker studies and others are welcome. Early animal studies or clinical trials of new methodologies are also welcome. This Special Issue will accept both review and original research articles.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
