Recent Advances in Obstetrics and Gynecology Diagnostics

Message from the Guest Editor

Recent technological developments are rapidly transforming diagnostic approaches in obstetrics and gynecology. Advances in imaging modalities, including high-resolution ultrasound and Doppler techniques, together with the increasing integration of artificial intelligence and machine learning algorithms, have opened new possibilities for early disease detection, risk prediction, and personalized patient management. Moreover, novel biomarker research and digital health technologies are providing additional opportunities to improve diagnostic accuracy and clinical decision-making in women's health. In this Special Issue, original research articles, systematic reviews, and narrative reviews are welcome. Research areas may include (but are not limited to) the following:

- Advanced ultrasound technologies in obstetrics and gynecology;
- Prenatal and fetal diagnostic imaging;
- Digital health tools and telemedicine in obstetrics and gynecology;
- Biomarkers and molecular diagnostics in maternal-fetal medicine;
- The early detection of gynecological diseases;
- Risk prediction models in pregnancy complications;
- Diagnostic innovations in reproductive medicine.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
