Diagnosis and Management of Dental Diseases

Message from the Guest Editors

The health of the mouth is paramount to overall health and quality of life. A variety of clinical studies have demonstrated the importance of maintaining oral health and the negative consequences of neglecting it. Most countries face a major health burden associated with dental diseases. There are also a variety of conditions affecting oral health that are of major public health importance, such as dental caries, oral cancers, and periodontal diseases. It is possible to prevent and treat most oral health conditions in their early stages. Most dentists, dental therapists, and dental hygienists focus on diagnosing and treating these diseases. It is the responsibility of dental healthcare professionals to ensure the oral and general health of their patients. The ability to formulate a differential diagnosis is based on both medicine and dentistry's key clinical skills. A timely and accurate diagnosis often requires the use of imaging modalities and laboratory tests. It is important to diagnose recalcitrant chronic diseases and initiate the appropriate treatment to give a patient a chance to recover health or to control their symptoms.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
