Precision Medicine of Breast Cancer in the Molecular Era

Message from the Guest Editor

Breast cancer is a global issue regardless of the socio-economic status of society. Early detection and surgical intervention as well as timely appropriate treatment and lifelong management are important for patient survival. Breast cancer is composed of heterogeneous disease groups that could be classified into several subgroups that require different treatment approaches for each one: luminal, HER2, and triple-negative breast cancer (TNBC). Neoadjuvant chemotherapy is now broadly performed for breast cancer and the tumor microenvironment, as well as the tumor itself, plays The introduction of immunotherapy in TNBC showed promising results and further prognostic factors should be investigated. The development of precision analytic tools enable the detection of high-risk patients and candidates for target therapy. Exploring diagnostic, prognostic, and predictive markers for breast cancer and the accumulation of the study results would create a valuable groundwork for future studies. This Special Issue encourages researchers to cooperate and discuss the diagnosis and prognosis of breast cancer. In addition, any related topics will also be welcomed.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
