Advances in Endoscopy

Message from the Guest Editors

The forthcoming Special Issue on advanced endoscopy aims to curate cutting-edge research within the field of gastrointestinal endoscopy. This issue invites paper submissions that focus on various facets of advanced techniques in gastrointestinal endoscopy. These encompass the endoscopic resection of pre-neoplastic and neoplastic lesions in the upper and lower gastrointestinal tract, third-space endoscopy targeting motility disorders (E-POEM for achalasia and G-POEM for gastroparesis), and endoscopic management of surgical complications, including anastomotic leaks. The Special Issue strives to advance our understanding and capabilities in the domain of advanced gastrointestinal endoscopy, with the ultimate objective of enhancing patient care and outcomes.
