

Special Issue

Structure–Function Relationship in Retinal Diseases, Second Edition

Message from the Guest Editors

Therapies for degenerative retinal diseases are rapidly evolving toward personalized or precision medicines, the aim of which is to stop or reverse the degenerative process by targeting its molecular mechanisms. In order to optimize this approach, it is essential to evaluate in detail the relationships between the structure and function of the retina in different pathologies. This Special Issue aims to examine the correlations (or absence thereof) between the retinal structure and function in degenerative diseases of the retina, from animal models to clinical practice. This approach has important implications for expressing the maximum therapeutic potential of emerging treatments based on personalized medicine.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
