

Special Issue

Oral Squamous Cell Carcinoma: Diagnostics and Management

Message from the Guest Editors

This Special Issue aims to advance the understanding and clinical management of oral squamous cell carcinoma (OSCC), a prevalent malignancy of the head and neck region. The focus will be on cutting-edge diagnostic techniques, including molecular biomarkers, advanced imaging modalities such as PET-CT and 3D modeling, and artificial intelligence-driven tools for early detection and accurate staging. Contributions will explore novel screening methods and their role in improving diagnostic precision. Additionally, this SI will address contemporary management strategies, encompassing navigation-guided surgical interventions, radiotherapy, immunotherapy, and targeted therapies. Emphasis will be placed on personalized treatment approaches, including the use of genomic profiling to guide therapeutic decisions and improve patient outcomes. The role of multidisciplinary collaboration in optimizing care, rehabilitation, and quality of life for OSCC patients will also be highlighted. By compiling insights from leading experts, this SI seeks to provide a comprehensive resource on innovative diagnostics and tailored therapeutic strategies to enhance the prognosis and management of OSCC.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
