### Message from the Guest Editor

We have the pleasure to invite you to submit your work to this Special Issue on “Computational Intelligence in Multi-Omics Aiding Early Diagnosis”. The scope of this Issue mainly covers the use of computational intelligence approaches, such as machine learning and deep learning, for the analysis of medical, biological and multiomics data of all natures and associated with any disease. Topics of interest include, but are not limited to:

- Novel algorithms for advancement in early diagnosis using biological, medical and omics data;
- The use of computational intelligence in diagnostic biomarkers, with a focus on early diagnosis;
- Early diagnosis of diseases using medical image analysis;
- Computational intelligence in bioinformatics-aided early diagnosis;
- Biomedical applications related to early diagnosis.
