Special Issue

Advances in Diagnosis and Management of Skin Diseases

Message from the Guest Editor

The field of dermatology has experienced remarkable development in recent years, with advances in diagnostic techniques and therapeutic approaches that improve patient outcomes. Accurate diagnosis is necessary for an effective treatment, particularly as the spectrum of skin diseases continues to be described. Today, the integration of diagnostic tools-ranging from molecular techniques to imaging innovations-enables earlier and more precise detection of dermatologic conditions. Simultaneously, the development of novel therapies, including targeted and personalized treatments, is changing the management of chronic and complex skin diseases. In this Special Issue, entitled "Advances in Diagnosis and Management of Skin Diseases", we aim to explore the current scenario and future directions in dermatologic care. Through a series of expert contributions and comprehensive reviews, we will highlight key innovations and clinical experiences that reflect the dynamic of modern dermatology.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
