

## Special Issue

# Recent Advances in Maternal-Fetal Medicine

### Message from the Guest Editor

Recent advances in maternal–fetal medicine have significantly enhanced our ability to monitor, diagnose, and manage complex conditions during pregnancy. Innovations in prenatal imaging, non-invasive genetic testing, and fetal therapy have improved outcomes for both mother and fetus. Advances in artificial intelligence, telemedicine, and individualized risk assessment are reshaping prenatal care by enabling earlier interventions and more precise management strategies. In the biggest step forward, artificial intelligence is increasingly playing a transformative role in maternal–fetal medicine, aiding in the early detection of complications, enhancing imaging interpretation, and supporting clinical decision-making through predictive modeling and personalized care pathways. This Special Issue explores key breakthroughs and ongoing challenges in the field, highlighting the integration of cutting-edge research into clinical practice to promote safer pregnancies and healthier births. We warmly invite contributions in the form of original articles that will help showcase and increase the visibility of research efforts in the field of maternal–fetal medicine.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
