Advances in Diagnosis and Prognosis of Breast Cancer

Message from the Guest Editor

Breast cancer remains the most prevalent malignancy in women and its incidence continues to increase worldwide. In the last decade, meaningful insights into the biology of breast cancer have been achieved, and therefore significant advances in locoregional and systemic treatment have been made. The latest diagnostic techniques include advanced imaging modalities such as MRI, PET-CT, and ultrasound-guided biopsy. In particular, there is a focus on the role of molecular biomarkers in early detection and personalized medicine. In addition, with the advent of genetic testing, our understanding of the risk of breast cancer has evolved significantly. Exploring classical clinical–pathological and genomic prognostic parameters can more precisely facilitate in predicting the likelihood of distant disease recurrence and overall survival. This Special Issue aims to enhance our knowledge regarding the latest advancements in the field of breast cancer diagnosis and prognosis. Original research articles, reviews and other papers are welcome. We look forward to receiving your valuable submissions.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
