Advanced Electrocardiogram for Clinical Applications

Message from the Guest Editor

The surface electrocardiogram (ECG) continues to have a significant role in clinical diagnostics. In patients with arrhythmias, the ECG is vital not only for obtaining a correct diagnosis but also for the prognostic assessment of the arrhythmia. A correct diagnosis, however, can only be made following a rational and enlightened interpretative process.

In structural heart disease, on the other hand, the ECG is still an important diagnostic tool and is able to provide data with independent prognostic value, helping to direct the correct therapeutic approach.

The main problem is that electrocardiography is difficult, and its apparent simplicity is a lure, or worse, a deception! In this Special Issue, electrocardiography experts will highlight the most recent and fundamental advances in cardiac electrophysiology and electrocardiographic diagnosis.

We welcome submissions related to, including but not limited to, the role of the ECG in a) cardiac electrophysiology; b) the diagnosis and treatment of cardiac arrhythmias; c) cardiomyopathies; d) myocardial ischemia; e) extracardiac pathologies; and f) electrolyte and metabolic disorders.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.4 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2026).
