Breast and Gynecological Cancers: From Diagnosis to Prognosis

Message from the Guest Editors

Breast and gynecological cancers represent an imperative health problem because of their high incidence, mortality, and impact on patient quality of life. They are responsible for more than 40% of all cancers and 30% of all cancer mortality in women worldwide.

Major progress has been made regarding more accurate diagnostic tools and new treatment modalities in gynecological and breast cancers. Nevertheless, many open questions remain regarding early diagnosis, correct therapeutic options, and treatment sequences. This Special Issue aims to facilitate access to information for gynecologists, surgeons, medical oncologists, radiation oncologists, imaging specialists, and pathologists. Genetic factors play an important role in breast and gynecologic cancers, and we gladly welcome articles regarding their impact on biomarker research and precision oncology. The submission of high-quality original articles, multidisciplinary works, and well-designed meta-analyses and reviews is encouraged to help gain better insights into the current knowledge regarding this topic and further research perspectives in the early diagnosis and management of breast and gynecological cancers.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
