

Special Issue

Alzheimer's Disease: Diagnosis, Pathology and Management

Message from the Guest Editor

Alzheimer's disease (AD) is one of the most significant public health challenges of our time, affecting millions of people and their families worldwide. As the global population ages, the incidence of AD continues to rise, highlighting the urgent need for understanding its complex pathology, early diagnosis, and effective management strategies. This special issue aims to provide researchers, clinicians, and readers with a comprehensive platform to explore in depth the molecular and cellular mechanisms that lead to AD, advances in diagnostic techniques, and innovative treatments.

Guest Editor

Dr. Liam L. Chen

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
