

Special Issue

Diagnosis and Management of Lung Cancer

Message from the Guest Editors

Lung cancer is a major public health concern and continues to be one of the leading causes of cancer-related deaths worldwide. The timely and accurate diagnosis of lung cancer is crucial for the successful management of this disease, and the field is constantly evolving with the development of new diagnostic and treatment modalities. The aim of this Special Issue of *Diagnostics* is to provide a comprehensive overview of the current state-of-the-art techniques in the diagnosis and management of lung cancer. This issue will cover a wide range of topics, including (but not limited to) novel imaging and other diagnostic methods, screening and early detection, pathology and biomarkers, as well as risk reduction and pertinent management strategies. Our objective is to disseminate the latest advances in the diagnosis and management of lung cancer to clinicians, researchers, and healthcare professionals, with the hope of spurring further investigation and progress in this field. We encourage researchers and clinicians to submit their best work, and we look forward to publishing a high-quality and impactful collection of articles.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
