Advances in Endoscopic Diagnosis and Tissue Resection Techniques

Message from the Guest Editors

Advances in endoscopy have significantly improved our ability to detect lesions in the gastrointestinal (GI) tract and more accurately diagnose pathology. This may facilitate early recognition of mucosal abnormalities, improve lesion assessment, as well as guide resection. This Special Issue focuses on advances in endoscopic diagnosis, as well as developments in tissue resection strategies. Invited topics for this Special Issue may include:

- Advanced endoscopic techniques, such as magnifying and image-enhanced endoscopy and virtual chromoendoscopy in the upper and lower GI tract;
- Artificial intelligence and computer-aided diagnosis;
- Advances in capsule endoscopy (CE) and/or the use of various types of CE for endoscopic diagnosis;
- Advances in small bowel enteroscopy and/or the use of small bowel endoscopy in the diagnosis of small bowel lesions;
- Other developments in upper and lower GI endoscopy;
- Advances in tissue resection techniques in the upper and lower GI tract, including EMR, ESD, hybrid techniques and FTRD, endoscopic suturing for closure of defects, use of hemostatic agents for prevention of post-polypectomy bleeding, etc.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
