Diagnosis, Prophylaxis and Treatments of Cytomegalovirus Infection and Reactivation

Message from the Guest Editor

Cytomegalovirus (CMV) is a well-known ubiquitous herpesvirus that is highly diffused among the population with an estimated overall seroprevalence rate of over 50% that increases with age. It is known to cause a wide range of clinical syndromes, from asymptomatic infection in most healthy hosts to severe and even fatal disease in newborns and immunocompromised individuals. Among these, hematopoietic stem cell transplantation (HSCT) recipients are the population at higher risk, in which CMV reactivation represents one of the most frequent viral complications, occurring in about 70% of CMV seropositive HSCT recipients, with rates of recurrence after a first CMV-DNAemia as high as 50–70%. In this Special Issue, we aim to explore current and innovative diagnostic approaches and treatment strategies whose understanding and improvement is crucial in the management and prevention of CMV-related complications. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
