Advances in Plastic Surgery: Diagnosis, Management and Prognosis

Message from the Guest Editor

We are pleased to announce a new Special Issue in *Diagnostics*, titled "Advances in Plastic Surgery: Diagnosis, Treatment and Prognosis". This Special Issue focuses on the medical field of plastic surgery, which covers the treatment of injuries; the disease management of skin, muscles, and bones; and the correction of congenital or acquired tissue and organ defects and deformities. With the rapid advancement of medical technology, plastic surgery's surgical techniques continue to evolve (through the use of 3D printing and robotic surgery), greatly enhancing the precision, safety, and effectiveness of these surgeries. In this process, diagnosis and prognosis assessments play important roles. They are not only the prerequisites for formulating treatment plans but also important bases for evaluating surgical outcomes and predicting patients' future health conditions. This Special Issue aims to present readers with the latest advancements in diagnosis, treatment, and prognosis within plastic surgery. Original articles and review papers are welcome.

Guest Editor

Dr. Konstantinos Seretis

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
