Diagnosis of Pancreatic Diseases

Message from the Guest Editor

Pancreatic diseases include diabetes mellitus, exocrine pancreatic insufficiency, cystic fibrosis, pseudocysts, cysts, congenital malformations, pancreatic cancer, etc. The pancreas has a special anatomical location in the human body, adjacent to major organs and blood vessels such as the liver, duodenum, stomach, and spleen, which makes local treatment methods such as surgery and radiotherapy very difficult. Therefore, the early diagnosis of these diseases is critical for effective treatment and improved patient outcomes. However, pancreatic cancer often has an insidious onset and nonspecific clinical manifestations, making early diagnosis even more difficult. In this issue, we aim to highlight the latest diagnostic techniques and advances in imaging technology, biomarkers, and genetic testing that enhance the accuracy and timeliness of pancreatic disease diagnosis. We are looking forward to accepting original research and review articles dealing with these and related areas. We hope to promote the development of the diagnostic level of pancreatic diseases through the efforts of researchers and clinicians, so that patients can achieve a better prognosis and quality of life.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
