Advances in PET/CT Imaging

Message from the Guest Editors

PET-CT is a relatively new modality in the evaluation of human disease. It combines the best attributes of functional and anatomical imaging with the ultimate objective of contributing beneficially to the patient journey. This is a fast growing and evolving field. In this Special Issue on “Advances in PET/CT Imaging”, we focus on advances in the hardware associated with PET-CT, newer radiopharmaceuticals, newer indications for existing tracers, the use of PET-CT to guide therapeutic decision making and response assessment, as well as a vision of the future trends. We believe that this Special Issue will be a useful resource for practitioners from a wide background including (but not limited to) nuclear medicine, radiology, medical physics, radio-pharmacy, oncology, infectious diseases, cardiology, and hospital managers.

Guest Editors

Dr. Sobhan Vinjamuri

Department of Nuclear Medicine, Royal Liverpool University Hospital, Liverpool, UK

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
