New Progress in Diagnosis and Management of Asthma

Message from the Guest Editor

Asthma is the most common non-communicable disease worldwide, and the morbidity rate increases every year. As a heterogeneous disease, asthma is often underdiagnosed or -treated. The disease complexity explains its inclusion in the list of incurable diseases, so only phenotypic diagnosis and individualized treatments can control the course and severity of the disease and improve the patients' quality of life. This Special Issue aims to address the latest findings in the field of diagnostics and management of asthma. The original works may include novel molecular and epigenetic biomarkers, asthma phenotyping, as well as the latest advances in management of severe asthma through the precision medicine, selectively targeting the eosinophils, neutrophils, T2 and non-T2 cytokines, and alarmins. The topics include, but are not limited to:

- Pathophysiology in asthma;
- Genomics, metabolomics, and epigenetics in asthma;
- Biomarkers in asthma;
- Airway remodeling in asthma;
- Phenotypes and endotypes in asthma;
- Advances in therapy in asthma;
- Biologics in asthma.

I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
