Special Issue

Hepatobiliary Diseases: Diagnosis and Management – 2nd Edition

Message from the Guest Editor

In the last decade, the global burden of liver disease and cirrhosis has increased. Viral hepatitis remains the most common cause of liver deaths, and nonalcoholic fatty liver disease (NAFLD) is the most rapidly growing contributor to liver mortality and morbidity. Liver disease accounts for approximately 2 million deaths per year worldwide, 1 million due to complications of cirrhosis and 1 million due to viral hepatitis and hepatocellular carcinoma. With improvements in the management and treatment of viral hepatitis, the burden of liver disease is shifting toward alcoholic liver disease (ALD) and NAFLD. The aim of this Special Issue entitled "Hepatobiliary Diseases: Diagnosis and Management" is to share upto-date information about the diagnosis and treatment of hepatobiliary disease. The scope of the issue will include recent knowledge regarding the NAFLD, noninvasive methods of steatosis and fibrosis detection, detection of portal hypertension, advancement of endohepatology, and new diagnostic methods for periampullary tumor detection as well as up-to-date information about the treatment of common hepatobiliary diseases.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
