Evaluating Novel Biomarkers for Personalized Medicine

Message from the Guest Editors

Standard and cutting-edge biomarkers for the diagnosis and evaluation of different illnesses will be covered in this Special Issue. The emphasis will be on personalized medicine, since this innovative strategy enables healthcare professionals to identify the most effective therapies for each patient by using diagnostic tests and biomarkers.

Evidence-based findings indicate that many medications are unsuccessful for some individuals, and hence this method is crucial. Healthcare professionals can create individual preventative and treatment plans by considering the patient's medical history as well as biomarkers throughout the diagnosis process.

Treatments that are customized for each patient offer both medical and financial benefits, making them not only essential for patients and physicians, but also welcomed by regulatory agencies as well as insurance providers.

We encourage authors with expertise in a variety of medical areas to share their knowledge by submitting both original research and review articles. Authors from referral centers for cutting-edge therapy are especially encouraged to contribute.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
