Diagnosis and Management of Gynecological Diseases: Advancements and Challenges

Message from the Guest Editor

This Special Issue of *Diagnostics* has been created with the aim of providing the global scientific community with an updated insight into the most recent advancements and emerging challenges in clinical gynecology.

Technology, laboratory methodologies, instruments, and computerized applications such as artificial intelligence are significantly influencing some of these innovative perspectives, especially in terms of investigating and managing gynecological patients, which range from genital infections to surgical techniques and congenital abnormalities to reproductive impairments. We are making significant steps forward, both in terms of biological knowledge and clinical applications, for several conditions that were considered definitively settled and established. The gynecological community of investigators and clinical professionals has always been particularly involved and interested in experimenting with new frontiers and new horizons, in some instances pioneering revolutionary approaches that have contributed to extraordinary opportunities for health improvement. We sincerely look forward to and welcome your contributions to this Special Issue of *Diagnostics*.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
