Emerging Imaging Techniques in Reconstructive Microsurgery

Message from the Guest Editor

Emerging imaging technologies are playing a growing role in advancing the safety, precision, and outcomes of reconstructive microsurgery. This Special Issue aims at highlighting recent developments and clinical applications of imaging modalities that assist in preoperative planning, intraoperative navigation, and postoperative assessment in reconstructive procedures. Techniques such as high-resolution ultrasound, indocyanine green (ICG) angiography, dynamic infrared thermography, MRI, and novel 3D imaging systems are increasingly used to evaluate vascular status, optimize flap design, and monitor tissue perfusion. These tools contribute to better decision-making, reduced complication rates, and improved surgical results. This collection will focus on both experimental and clinical research, including case series, original studies, and comprehensive reviews that explore the utility, limitations, and future directions of imaging in microsurgery. Contributions from various surgical subspecialties, including plastic, orthopedic, and head and neck reconstruction, are welcome.

Guest Editor

Dr. Marios N. Papadakis

Department of Surgery, Helios Clinic, University Hospital Witten-Herdecke, Heusnerstr 40, 42283 Wuppertal, Germany

Deadline for manuscript submissions

30 April 2026

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
