Wearable Devices for Health Monitoring and Disease Diagnosis

Message from the Guest Editor

Wearable devices, by integrating technologies such as sensors, wireless communication, and multimedia, can realize real-time monitoring and data analysis of human physiological information, providing strong support for health management and medical diagnosis.

In recent years, wearable device technology has advanced rapidly. On one hand, continuous advancements in sensor technology have significantly improved the monitoring accuracy of wearable devices. On the other hand, the incorporation of artificial intelligence and machine learning algorithms has empowered these devices to conduct more complex data analysis, leading to even more precise health recommendations. This Special Issue aims to show the latest developments and applications of various wearable devices used for health monitoring and disease diagnosis. Original research articles and reviews are welcome.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
