# Ovarian Cancer in 2025–2026: A Comprehensive Look at Characteristics, Screening, Diagnosis and Treatment

### Message from the Guest Editor

Ovarian cancer is deadly, claiming more women than all other gynecological malignancies combined. However, when detected at an early stage, ovarian cancer is highly curable. The forthcoming Special Issue—Ovarian Cancer in 2025–2026—focuses on several key elements that are essential for understanding ovarian cancer, its characteristics, risk factors, responsiveness to chemotherapy, and immunotherapy, as well as vaccines that are relevant to ovarian cancer.
