

## Special Issue

# Diagnostic Advances in Obstetrics and Gynecology, Breast Disease and Women's Health

### Message from the Guest Editor

The constant progress in the field of obstetrics and gynecology has led to the development of four distinct subspecialties, i.e., gynecologic oncology, maternal-fetal medicine, reproductive medicine and urogynecology, along with the partially overlapping fields, which are of special interest and require continuous research. Those research areas are gynecological endoscopy, advanced gynecological and obstetrical ultrasound, mastology and breast surgery, pediatric and adolescent gynecology, menopausal and geriatric gynecology, and family planning. Modern translational research and good clinical practice dictate multidisciplinary co-operation, including radiology, general and plastic surgery, anesthesiology, radiotherapy, medical oncology, pathology, molecular biology, psychiatry and psycho-oncology, and public health. Finally, women's health also includes health issues that are common to both genders, especially cardiovascular and neurologic disease in the elderly, considered from the female perspective. We welcome original research and review articles on each and all of these areas.

### Guest Editor

Prof. Dr. Menelaos Zafrakas

School of Health Science, International Hellenic University, 57400 Thessaloniki, Greece

### Deadline for manuscript submissions

30 November 2025

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
