Medical Imaging in Diagnosis, Prevention and Rehabilitation of Musculoskeletal Injuries

Message from the Guest Editors

Musculoskeletal injuries can occur due to an acute trauma or repetitive stress to the skeletal muscle, tendon, ligament, fascia and bone tissue. Musculoskeletal impairment is the leading cause of rehabilitation in the world. The current rehabilitative intervention often ignores the impact of precision assessment using medical imaging to better understand pathophysiological progression and rehabilitation-induced remodeling of the musculoskeletal system. These medical imaging techniques can be used to address the unmet needs in musculoskeletal injury diagnosis and rehabilitation. The objective of this Special Issue is to bring together clinicians and researchers to explore the use of medical imaging in improving clinical practice in the diagnosis, prevention and rehabilitation of musculoskeletal injuries. This Special Issue also welcomes the application of medical imaging among various athletes for better training and the prevention of musculoskeletal injuries. All topics related to medical imaging in musculoskeletal injuries are welcome.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
