

Special Issue

Advances in Human Anatomy— 2nd Edition

Message from the Guest Editor

The quest to overcome illness has long been driven by the collaborative efforts of medical experts, with anatomy being a field vital for accurately diagnosing diseases. As medical technology has advanced, so too has the study of anatomy, maintaining its relevance and importance. This Special Issue aims to survey the growth of anatomical science as it keeps pace with the latest medical technologies. It will spotlight the importance of anatomy in modern diagnostic methods while tracing its development through historical milestones and contemporary research strategies. We intend to initiate a dialogue about the newest anatomical research methods, emphasizing how these developments contribute to our diagnostic capabilities. We will also revisit the historical trajectory of anatomical knowledge and how it continues to inform current medical practice. By bridging anatomy with modern medical technology, this issue seeks to not only recount the progress made but also to anticipate the future paths of anatomical research. The goal is to present viewpoints that underline anatomy's critical role in enhancing diagnostic precision and, by extension, improving patient outcomes.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
