Advances in Diagnosis and Management of Endometrial Diseases

Message from the Guest Editor

We are delighted to invite submissions to this Special Issue, entitled “Advances in Diagnosis and Management of Endometrial Diseases”. In women of reproductive age, the endometrium is a unique mucosal tissue that undergoes periodical dynamic changes including proliferation, differentiation, and shedding (menstruation) under the influence of ovarian steroids. When conception occurs, endometrium transforms into decidua, which is a specialized secretory tissue that forms the outermost layer of the placenta to support a pregnancy. Meanwhile, disorders of the endometrium, including endometrial cancer/hyperplasia, endometriosis, adenomyosis, endometritis, polyps, intrauterine adhesion, and endometrial thinning, can manifest with various symptoms such as abnormal uterine bleeding and pelvic pain, subsequently causing infertility. This Special Issue aims to showcase cutting-edge research, novel methodologies, and impactful applications in the diagnosis and management of both benign and malignant endometrial diseases. We welcome original research articles, review articles, case reports, and series. We look forward to your insights and discoveries.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
