Data Science and Artificial Intelligence in Laboratory Medicine

Message from the Guest Editor

The application of data science in laboratory medicine allows us to obtain information that may have been hidden when working with small data volumes (a traditional approach). Furthermore, artificial intelligence allows us to automate and search for patterns in clinical databases. The development of algorithms that incorporate both data science and artificial intelligence tools will allow us to exploit the information contained in laboratory databases to obtain high-value information. I welcome researchers in relevant fields to contribute their excellent studies to this Special Issue. The potential topics include, but are not limited to, research related to laboratory medicine, ranging from genomic or proteomic studies, molecular diagnostics, clinical chemistry, immunology, hematology, and microbiology to data science and artificial intelligence algorithms. I believe that this broad collection of research will highlight our current understanding and utility of this field.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
