Pathological Speech Classification and Processing for Advanced Medical Diagnosis

Message from the Guest Editor

The Special Issue "Pathological Speech Classification and Processing for Advanced Medical Diagnosis" delves into the emerging field of pathological speech analysis, examining its potential in enhancing medical diagnosis. This Special Issue highlights innovative techniques and methodologies for speech recognition, analysis, and processing in diseased states, aiming to improve the accuracy and efficiency of clinical assessments. By exploring the latest advancements in this domain, it aims to foster a better understanding of pathological speech patterns and their application in precision medicine.
