

Special Issue

Predictive and Prognostic Markers in Critically Ill Patients, 2nd Edition

Message from the Guest Editors

We are delighted to present a Special Issue in Section Pathology and Molecular Diagnostics: “Predictive and Prognostic Markers in Critically Ill Patients, 2nd Edition”. Today, with the exponential growth in biomarker research, there is enthusiasm that our expanding knowledge will translate into improved decision making and outcomes. Continuous evaluation of our practice and incorporation of these new ideas and studies has the potential to improve patient care. Prognostic biomarkers may predict the course or trajectory of disease, allowing for early determination of disposition and goals of care. The future development and adoption of guidelines and protocols using biomarkers has the potential to minimize variability and maximize benefit. Through thoughtful study design and collaboration, the biomarker era will surely transform and shape the future of medicine. Therefore, *Diagnostics* is proud to offer this platform to promote and to highlight evaluable research on predictive and prognostic markers in the specific field of critical care medicine.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
