Special Issue

Advances in Diagnostics of Chronic Kidney Disease

Message from the Guest Editors

This Special Issue of Diagnostics will be devoted to the latest advances in chronic kidney disease (CKD) diagnostics. CKD in different stages affects approximately 12% of the world's population. Nowadays, diabetes and hypertension are among the leading causes of CKD.

Due to the constant increase in the total number of diabetic patients, the incidence of CKD caused by diabetic nephropathy and subsequently the number of patients with end-stage renal disease (ESRD) is expected to rise. Early diagnosis and treatment of diabetic nephropathy may have a crucial impact on disease progression.

Glomerulonephritis (GN) is, next to hypertension and diabetes, one of the leading causes of CKD. Both nephrotic and nephritic syndromes are clinical conditions, requiring extensive diagnostic workup, including laboratory tests, imaging studies and eventually renal biopsy, with additional tests and specialized stains.

We invite scientists to submit articles presenting new achievements in chronic kidney disease. We look forward to your submission.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
