# Artificial Intelligence and Machine Learning for Infectious Diseases

### Message from the Guest Editor

Infectious diseases are caused by microorganisms belonging to the class of bacteria, viruses, fungi, or parasites. Despite the advancements in medicine, infectious diseases are a leading cause of death worldwide, especially in low-income countries. In the healthcare system, there are instances where AI has done marvels in the diagnosis of various health conditions and the interpretation of complex medical disorders. This Special Issue aims to identify potential applications of artificial intelligence and machine learning in the field of infectious diseases.
