

Special Issue

Advances in Imaging and Minimally Invasive Techniques for Renal and Adrenal Masses

Message from the Guest Editors

This Special Issue aims to present recent advances in diagnostic and interventional radiology in urology, particularly regarding renal and adrenal masses. The impressive refinements in diagnostic and therapeutic techniques in this field make this a topic of the utmost importance. Original research articles and case series that highlight the results of advanced techniques to better characterize morphological and functional features of renal and adrenal masses are welcome, especially those focusing on the technological advancement of imaging, post-processing and interventional techniques. Reviews articles (narrative reviews, systematic reviews and metanalysis) are welcome, and research with the aim of providing comprehensive knowledge on cutting-edge imaging techniques and minimally invasive treatment approaches will be considered for publication. Lastly, articles on the potential role of artificial intelligence (AI) and big data and on their future perspectives may be considered for publication in this Special Issue.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
