Technical and Clinical Applications on Long-Axial-Field-of-View/Total Body PET-CT

Message from the Guest Editors

This Special Issue aims to present the role of TB/LAFOV PET/CT in the diagnosis and imaged-based therapeutic management of different (non)oncological diseases, large vessel vasculitis, and also with a focus on the technical background and developments in the era of TB/LAFOV PET/CT camera systems and quantification methodology. We encourage authors to submit both technical and clinical studies in this field. Clinical studies may include systematic reviews/meta-analysis, original retrospective studies, and prospective studies.
