

Special Issue

Advancements in the Diagnosis and Treatment of Inflammatory Bowel Diseases

Message from the Guest Editor

This Special Issue has the aim to explore the latest advancements in the diagnosis and treatment of chronic inflammatory bowel diseases (IBDs). Emphasizing innovative diagnostic techniques, this issue dives into imaging modalities, biomarker identification, scoring quality of life, diagnostic work-ups of EIMs, and the utilization of endoscopic advancements to enhance diagnostic accuracy. A critical focus is placed on evaluating therapeutic responses, with discussions on personalized medicine approaches, biologic treatments, and novel small molecules. This series will also examine the integration of artificial intelligence (AI) in predicting disease course, optimizing treatment plans, and improving patient outcomes. Additionally, the impact of IBD on patients' quality of life will be addressed, with insights into comprehensive management strategies that address both physical and psychological aspects of the disease.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
