Advances in the Diagnosis and Management of Renal Cell Cancer

Message from the Guest Editor

Renal cell carcinoma (RCC) is the most common type of kidney cancer; in recent years, there has been a growing interest in identifying tumor markers for both diagnostic purposes and to improve the predictive power of clinical and pathological parameters. The progressive introduction of high-throughput technologies has led to a greater understanding of molecular mechanisms underlying the development of RCC and the identification of novel potential therapeutic targets. In addition, the treatment landscape for localized and metastatic RCC is rapidly evolving, with risk stratification being a crucial step in developing a treatment plan.

This Special Issue of *Diagnostics* is dedicated to studies exploring the application of different approaches to understand the alterations in biological systems occurring in the pathogenesis of RCC, as well as minimally invasive treatment and translational research for the diagnosis and management of this tumor.

Guest Editor

Prof. Dr. Giuseppe Lucarelli

Andrology and Kidney Transplantation Unit, Department of Emergency and Organ Transplantation—Urology, University of Bari "Aldo Moro", 70124 Bari, Italy

Deadline for manuscript submissions

30 September 2025

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
