Special Issue

Diagnosis and Management of Chronic Airway Diseases

Message from the Guest Editors

Due to the impact of environmental change and the unprecedented COVID-19 global pandemic, we are facing challenges in the diagnosis and management of chronic airway diseases. Meanwhile, new technologies such as omics, miRNA, and microbiome have paved the way for the revelation of hidden pathogenesis and new biomarkers. Moreover, biologics has created a new era in asthma treatment, and further, we have started to refer to the remission of asthma. However, we also acknowledge that there remain knowledge gaps in deeper understanding of etiologies and pathogenesis. probably related to the suboptimal treatment of chronic airway diseases. Therefore, this Special Issue would like to focus on the broad spectrum of diagnosis and management of chronic airway diseases. We welcome research regarding advances in diagnostic methods and interventions with treatment potential. Additionally, machine learning for the prediction of disease or prognosis, big data analysis, and routinely collected data for the development of new evidence would be informative.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
