Special Issue

Advances in the Diagnosis and Management of Stroke

Message from the Guest Editors

In recent years, the management of stroke has deeply changed as result of recent evidence coming from the scientific community. The results of ongoing trials are likely to further change stroke management in the near future. New therapeutic options are now available to treat patients with acute stroke, and innovative diagnostic tools are currently being developed to select patients that can benefit the most from available treatments. Although great strides have been made in the management of stroke, to date, stroke still represents one of the commonest causes of death and disability. We are well aware of your involvement in the field and believe that you could make a brilliant contribution in this Special Issue. Therefore, we would be pleased if you submit a review or research article to this issue to enrich the current knowledge on management and diagnosis of stroke.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
