

## Special Issue

# Imaging Diagnosis in Abdomen

### Message from the Guest Editors

Imaging has a pivotal role in evaluating abdominal pathology. A good knowledge of indications is of crucial importance in the management of the patients with abdominal diseases. Ultrasound, computed tomography and magnetic resonance imaging all have important roles in evaluating abdominal abnormalities, with each technique having specific strengths and weaknesses. As the title suggests, this Special Issue aims to address the most recent advancements in the imaging diagnosis in abdomen. Novel diagnostic approaches (in particular, MR imaging with hepato-biliary contrast agents, diffusion and perfusion imaging; contrast-enhanced ultrasound; spectral imaging with dual-energy, multi-energy, and photon-counting CT; PET-CT and PET-MRI) are now available in abdomen, despite the fact that they are not always routinely used in clinical practice. However, the respective role in the diagnostic management of abdominal diseases is still debated, even in dedicated multidisciplinary teams. In conclusion, this Special Issue will try to create a collection of review articles and original contributions on the above-mentioned topics, with the intent of improving the quality of patients' care.

### Guest Editors

Dr. Francescamaria Donati

Department of Diagnostic and Interventional Radiology, and Nuclear Medicine, Pisa University Hospital, Via Paradisa 2, 56124 Pisa, Italy

Dr. Piero Boraschi

2nd Unit of Radiology, Department of Radiological Nuclear and Laboratory Medicine, Pisa University Hospital, Via Paradisa 2, Pisa 56124, Italy

### Deadline for manuscript submissions

closed (31 December 2023)

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer  
Department of Clinical Physiology, Nuclear Medicine & PET National  
University Hospital, Rigshospitalet, University of Copenhagen,  
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
