Advances in Emergency Medicine: Ultrasound, Innovative Protocols and Interesting Cases

Message from the Guest Editors

As never before we are witnessing a revolution in the field of Emergency Medicine, a branch that is increasingly taking advantage of the development of technology and specific skills to improve the quality of care.

Moreover, due to the instability of many critical patients and the need for diagnostics to be brought to the patient's bedside, the use of ultrasound appears to be of increasing importance, and, in our opinion, it deserves a dedicated space that highlights its merits and limitations. We specially speak of: echocardiography for diagnosis and non-invasive hemodynamic monitoring of critical patients, integrated cardio-pulmonary ultrasound, enterosonography, transcranial ultrasound, contrast-enhanced ultrasound, nerve plexus ultrasound for the implementation of loco-regional sedation protocols, invasive echo-guided procedures.

This special issue is born with the aims to bring knowledge on the advances in Emergency Medicine, and it is also open to interesting case reports able to apport a benefit to the scientific community on all crucial topics in this field.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
