Special Issue

Advances in the Diagnosis of Oral and Maxillofacial Disease: 2nd Edition

Message from the Guest Editor

The contributions within this edition will explore various aspects of diagnostic modalities, including advanced radiology techniques such as cone beam computed tomography (CBCT) and magnetic resonance imaging (MRI), which offer detailed anatomical information for precise diagnosis and treatment planning. Additionally, the articles included will discuss the application of optical imaging and diagnostic tools, providing insights into non-invasive methods for detecting early signs of disease and monitoring treatment responses. This Special Issue will also address prognostic assessments and the identification of biomarkers associated with disease progression and treatment response. By synthesizing the latest research findings and clinical insights across these diverse diagnostic modalities, this edition of Diagnostics will serve as a valuable resource for clinicians, researchers, and healthcare professionals involved in the diagnosis and management of oral and maxillofacial diseases. Ultimately, these advancements will contribute to improved patient care, treatment outcomes, and quality of life.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
