Diagnosis and Management of Biliary Tract Diseases in Adulthood and at Pediatric Age

Message from the Guest Editor

Extrahepatic biliary obstruction, intrahepatic biliary disruption, and impaired bile secretion by hepatocytes may lead to cholestasis at all ages. Pathogenic mechanisms of cholestasis in adults are widely different from children, although congenital malformations and genetic/metabolic liver diseases may occur or persist in adolescence/adulthood. The aim of this Special Issue is to deal with the challenging diagnosis and management of biliary tract diseases, highlighting strengths and limits at all ages.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
