Point-of-Care Diagnostics Technology and Applications

Message from the Guest Editor

Point-of-care (POC) diagnosis have the potential to be applied in various clinical investigations, not only for chronic diseases (or cancers), but also emergency or critical conditions. Historically, some studies found that POC technologies were very suitable for early type of biomarker or organ evaluation. In specimen testing, these technologies can be used for the design of virus gene fragment/antibodies, biomarkers of cancer cells, and enzymes of organs detections. For emergency applications, they can be used in bedside POC ultrasound evaluations or critical data testing. In recent studies, we found that the process of POC diagnostics was evaluated using new applications. Therefore, POC-related topics have become very popular, especially in clinical medicine as well as biochemical and biological technologies. In this Special Issue, we aim to provide an opportunity to widely introduce your related research. We are seeking your high-quality, original research and review articles that focus on the field of “Point-of-Care Diagnostics Technology and Applications”.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
