Diagnosis and Management of Arrhythmias

Message from the Guest Editors

We are delighted to invite you to contribute to this Special Issue. We aim to address critical aspects of arrhythmia diagnosis and management, encompassing a wide range of topics, including but not limited to the following:

Advances in electrocardiographic techniques for arrhythmia detection and characterization; Role of imaging modalities such as echocardiography, cardiac magnetic resonance imaging (MRI), and computed tomography (CT) in the evaluation of arrhythmias; Emerging biomarkers, genetic markers, and other tools for risk stratification and personalized treatment approaches; Multidisciplinary approaches to arrhythmia care, involving collaboration between cardiologists, electrophysiologists, cardiac surgeons, and other allied healthcare professionals; Digital health technologies for arrhythmia management; and so on.

We sincerely look forward to receiving your contributions.
