

Special Issue

Spectral CT Techniques and Functional Applications in Disease Diagnosis

Message from the Guest Editor

Spectral CT enables CT imaging to advance beyond the mere detection of pathology, expanding its role in the evaluation and management of disease. This Special Issue promotes research papers that address spectral CT techniques to make quantitative statements on disease. Next to clinical studies, we are also interested in the implementation of new scan protocols in experimental and preclinical studies that investigate the quantitative performance of spectral CT, including technology development papers that describe novel technologies.

Guest Editor

Prof. Dr. Nico Buls

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
