Advanced Imaging in Cardiomyopathy: Impact on Diagnosis, Clinical Management and Prognosis

Message from the Guest Editors

Cardiomyopathies represent an important cause of major adverse cardiac events and cardiac deaths in Western countries. Early diagnosis, follow up with advanced imaging and correct therapeutic management have been shown to improve the prognosis of patients with cardiomyopathies. Furthermore, advanced imaging can be helpful for invasive electrophysiological and surgical planning. The aim of this Special Issue is to provide an overview of advanced cardiovascular imaging in cardiomyopathies. In particular, it will be focused on the application of novel CT, MR and echocardiography techniques for the depiction of early involvement, follow up and risk stratification, focusing on future clinical application.

Guest Editors

Dr. Giuseppe Muscogiuri

Department of Radiology, IRCCS Istituto Auxologico Italiano, San Luca Hospital, Milan, Italy

Dr. Valentina Volpato

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
